LIMITLESS CREATIVITY

Stratasys J850™ TechStyle™ 3D printer is making waves with its revolutionary 3DFashion™ printing technology. For the first time ever, 3D algorithms can be printed direct-to-textile, creating fascinating illusions with color and light. Digital 3D design and aesthetics can now be created by a computer-generated design flow, that cannot be completed manually. In an industry where it was once not possible, TechStyle enables fashion designers to truly unleash their imagination with limitless creations and unparalleled flexibility and eco-friendly materials. With multiple advantages over traditional forms of design, you can create fantastic optical illusionary effects, direct to textile and garments, in clear print and in full color.

CERTIFIED MATERIALS

Printing with the TechStyle 3D printer can be done safely and responsibly, thanks to the patent pending VeroEco™ Flex family of materials. This family of semi-flexible materials are soft to the touch and boast vivid colors and robust adhesion to multiple types of fabrics, so garments stay intact through most standard machine wash cycles. What's more, VeroEco Flex materials are at the forefront of sustainability according to stringent industry standards. These semi-flexible materials are compliant with RSL (Restricted Substances List for Finished Products) industry standards for sustainability.

DESIGN FREEDOM

TechStyle allows designers and high-end fashion brands a new level of design freedom, for personalization and customization, in low-volume production, with seamless integration and minimum downtime. TechStyle has a virtually limitless color palette to choose from, with over 600K available colors in both matte and glossy finishes. Your required print area can be designated on a stretch of fabric up to 2m². The printer's cabinet holds 7 cartridges for materials, from vivid colors to full transparency that will support any design, including textures with both rigid and flexible eco-friendly materials. Easily print with your favorite design software from the multitude of compatible options and output your file direct to GrabCAD™ Print for printing.

UNPARALLELED PRODUCTIVITY

The TechStyle 3D printer is integrated with a sustainable LED unit that, in addition to being environmentally friendly, needs no replacement, no maintenance and allows for fantastic productivity. Switch it on and you are ready to print, no downtime! Refine each design to perfection with an easy-to-use workflow. TechStyle also features an interchangeable tray, for faster production runs and minimum down time.

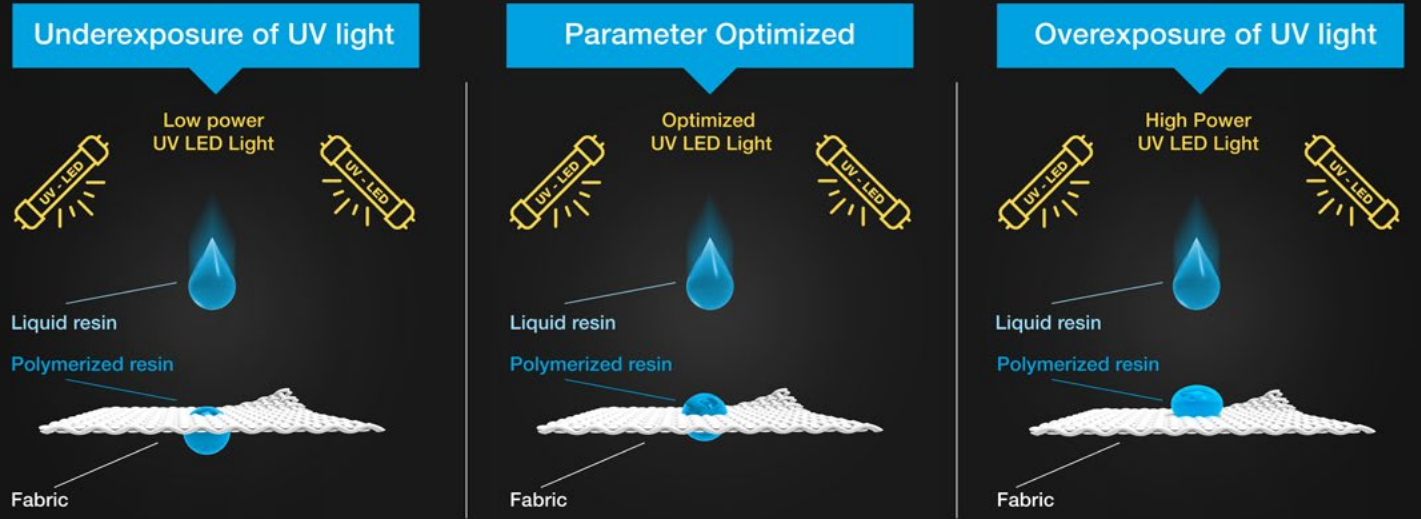

UNMATCHED CAPABILITIES

- TechStyle has a **2-mode capacity** that enables it to print directly onto textiles as well as used garments for repurposing. 3D models for fashion accessories, such as buttons, cufflinks, and bag clips, can also be printed, to a maximum height of 50mm.
- Experience a new level of efficiency with the patent pending **interchangeable tray**. With this feature, you can quickly swap out one tray for another while a print is running, allowing you to make lightning-fast production runs without any unnecessary down time. It's easy to switch trays quickly and effortlessly, ensuring your projects are printed quickly and efficiently every time.
- The unique patent pending **fabric analyzer** feature will analyze a fabric sample for digital design optimization, resulting in more accurate digital designs and considerable time and cost savings previously associated with iterative pre-production processes.
- TechStyle flexible printing capabilities are unmatched **with an adhesion optimization feature** that allows for a flexible workflow. GrabCAD™ Print software supports the entire printing process from concept to production of your 3D printed design on a large range of fabrics and flexible substrates.

J850™ TechStyle™ LED - Adhesion Optimization

EFFICIENT WORKFLOW

Streamline your workflow with GrabCAD Print software by printing directly from your favorite professional CAD formats, with or without the addition of advanced rendering software. Eliminate time-consuming painting or trial-and-error Pantone color matching with a single-click step in GrabCAD Print. Use smart default settings, tooltips, and notifications to guide you through a seamless printing process. Work with detailed views of your model, tray, and slice preview so you can make any necessary adjustments before going to print. The large, seven-material capacity of the Stratasys J850 TechStyle printer means you can load your most used resins and avoid downtime associated with material changeovers. GrabCAD Print software is an Industry 4.0 compatible system that will fully integrate with manufacturing execution systems (MES) and your digitized production floor.

SUSTAINABLE MANUFACTURING

Stratasys J850 TechStyle 3D printer promotes mindful manufacturing and low volume production, while eradicating oversupply and reducing unnecessary waste. As a founding member of the Additive Manufacturer Green Trade Association, Stratasys TechStyle eliminates the need for excessive inventories, while used clothing and accessories can be repurposed with the addition of 3D printed elements. Responsible consumption, industry innovation and revised supply chains go hand-in-hand with 3D printing technologies. This enables designers to generate full color, intricate designs, in-house, that can't be achieved through other processes. This is fashion forward; 3D Printing a better tomorrow, today.
